Repair and Maintenance Record

OSHA requires owners and operators to perform daily pre-shift inspections of Loader/Backhoes. This Loader/Backhoe Inspection & Maintenance Record is provided to help you meet this requirement. If you have any questions about the use of this book or about inspecting your aerial lift and/or other material handling devices, call:

ARXCIS, Inc. at (360) 297-3693.

Pre-Inspection of Loader/Backhoe

The following items are to be inspected on a daily basis or for less active Backhoe/Loaders, prior to its use. Additional daily or monthly checks may be required based on the type of forklift and its use. Consult the machine's owners manual for additional requirements.

Daily Inspections Checklist:

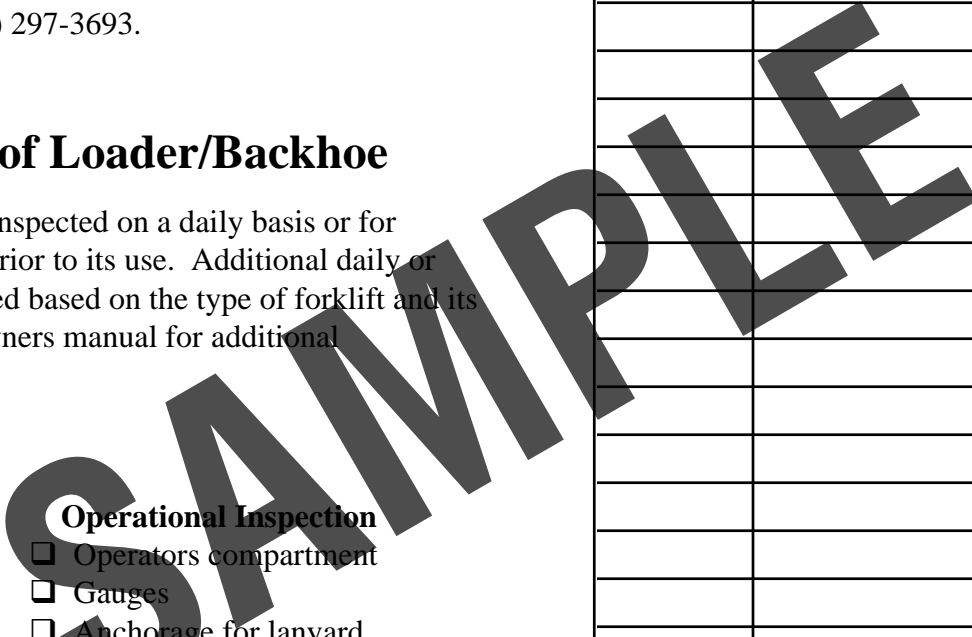

Visual Inspection

- Structural defects
- Cracked welds
- Loose fasteners
- Tire damage
- Boom and Attachments
- Loose wire connections
- Warning labels

Operational Inspection

- Operators compartment
- Gauges
- Anchorage for lanyard
- Steering
- Controls
- Warning devices

Date	Description of Work

The intent of this record book is to aid our customers in forklift inspections and maintenance. This document is not a definitive source and ARXCIS, Inc. does not accept respo
